- What is the invention?

Supporting sentences (Development):

- What is the first benefit? Give some explanation and / or examples.
- What is the second benefit? Give some explanation and / or examples.
- What is the third benefit? Give some explanation and / or examples.

Last sentence (Conclusion):

- How important / useful is the invention in our life?

Gợi ý:

Artificial Intelligence, also known as Al, is regarded as one of the great inventions of the 21st century because of the huge benefits it has brought to our lives. First, Al technology when incorporated in household appliances such as vacuum cleaners allows us to do household chores more effortlessly. With just a few buttons, smart vacuum cleaners will automatically clean our houses in the most effective way, without us having to keep an eye on them. This saves us a lot of time and energy to do other things while our houses are always spotless. Second, Al, when used at work, can definitely be a great helper to us. Chatbots, for example, can even replace a customer service officer when they can be used to answer customers' questions, or help customers plan their holidays, book flights and hotels. Third, a lot of Al applications on smartphones are extremely useful for travelling. Particularly, they can collect information about traffic, which can then help drivers find the most suitable routes and avoid traffic jams. In conclusion, Al has actually revolutionized the way we live, work and travel. With it, life has become much easier than ever before.

PRONUNCIATION PRACTICE

(Học sinh vào video bài giảng để sử dụng tính năng luyện phát âm)
