- Question 1. A. mention B. diverse C. justice D. service
Question 2. A. defensive B. typical C. domestic D. disaster

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 3 to 9.

One of the most dangerous drugs for pregnant women to consume is alcohol. Because alcohol is delivered quickly into the blood and passes quickly into the tissues and membranes, the human fetus is particularly vulnerable to **its** effects. The reality is that the negative effects on a fetus are so **pronounced** that babies born after exposure to alcohol are said to be suffering from fetal alcohol syndrome. As a pregnant woman drinks alcohol, the alcohol is passed into her bloodstream almost simultaneously. Moreover, because the bloodstream of the fetus is **inextricably** tied to that of the mother, the alcohol passes directly into the bloodstream of the fetus as well. And, what is more, the concentration of alcohol in the fetus is exactly the same as in the mother.

For the mother, this concentration is not a problem because her liver can remove one ounce of alcohol from her system per hour. However, the fetus's liver is not completely developed (how developed it is depends on its stage of development). The rate at which it is able to eliminate the alcohol from the blood of the fetus is much slower. Eventually, the alcohol will be returned to the mother's system by passing across the placenta, but this process is slow. By the time this takes place, major neurological damage may have already occurred.

Research has shown that as little as one drink of alcohol can produce significant, irreversible damage to the fetus. Babies born after exposure to alcohol generally exhibit facial distortion, inability to concentrate, and difficulty in remembering. Simply speaking, it is imperative that pregnant women avoid alcohol.

Question 3. What is the main topic of this reading?

Question 7. According to the passage, how does the concentration of alcohol in a fetus compare to that in the mother?

- A. The concentration is more. B. The concentration cannot be measured.
C. The concentration is less. D. The concentration is equivalent.

Question 8. According to the passage, how is alcohol finally returned to the mother's system?

- A. it is not completely returned. B. it is expelled by the fetus's liver.

C. it is transferred across the placenta.

D. it is carried through the bloodstream.

Question 9. Which one of the following was NOT mentioned as a sign of fetal alcohol syndrome?

A. concentration difficulties

B. disfigurement of the face

D. memory problems

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 10 to 17.

After 1785, the production of children's books in the United States increased but remained largely reprints of British books, often those published by John Newbery, the first publisher to produce books aimed primarily at diverting a child audience. Ultimately, however, it was not the cheerful, commercial-minded Newbery, but Anglo-Irish author Maria Edgeworth who had the strongest influence on this period of American children's literature. The eighteenth century had seen a gradual shift away from the spiritual intensity of earlier American religious writings for children, toward a more generalized moralism. Newbery **notwithstanding**, Americans still looked on children's books as vehicles for instruction, not amusement, though **they** would accept a moderate amount of fictional entertainment for the sake of more successful instruction. As the children's book market expanded, then, what both public and publishers wanted was the kind of fiction Maria Edgeworth wrote: stories interesting enough to attract children and morally instructive enough to **allay** adult distrust of fiction.

American reaction against imported books for children set in after the War of 1812 with the British. A wave of nationalism permeated everything, and the self-conscious new nation found foreign writings (particularly those from the British monarchy) unsuitable for the children of a democratic republic, a slate of self-governing, equal citizens. Publishers of children's books began to encourage American writers to write for American children. When they responded, the pattern established by Maria Edgeworth was at hand, attractive to most of them for both its rationalism and its high moral tone. Early in the 1820's, stories of willful children learning to obey, of careless children learning to take care, of selfish children learning to "tire for others," started to flow from American presses, successfully achieving Edgeworth's tone, though rarely her lively style. Imitative as they were, these early American stories were quite distinguishable from their British counterparts. Few servants appeared in them, and if class distinctions had by no means disappeared, there was much democratic insistence on the worthiness of every level of birth and work. The characters of children in this fiction were serious, conscientious, self-reflective, and independent—testimony to the continuing influence of the earlier American moralistic tradition in children's books.
